**ADDITIONAL TERMS AND CONDITIONS:** (1) Ingress and Egress to this right-of-way and easement shall be solely from the Southern or Northern boundaries of the above described easement, for the purpose of constructing, inspecting, repairing, protecting and maintaining the facilities and the removal or replacement of same at will, either in whole or in part, and the replacement of said pipeline with either like or different size pipe. (3) In further consideration of the payments from Grantee to Grantor, Grantee has fully compensated Grantor for all damages to Grantor's growing crops, pasture, fences, livestock and other real or personal property improvements caused by the initial construction of the facilities. After initial construction, Grantee shall have the right to cut and keep clear without payment of damages all trees, brush and other obstructions that may in the Grantee's opinion endanger, hinder or conflict with the construction, operation, inspection, protection, maintenance and use of said facilities. Said pipeline shall be buried to a minimum depth of thirty (30) inches. (4) Grantee shall, within a reasonable time following the completion of construction, restore said right-of-way. Restoration shall include, where necessary, final grading, reseeding and installation of erosion control structures. Grantee agrees to re-seed all disturbed areas with a seed mix native to the area or as specified by Grantor. Grantee shall be responsible for control of noxious weeds on land disturbed by construction of said pipeline. (5) Grantor reserves to himself, his heirs, successors and assigns, all water and mineral rights in any wise appertaining to said lands, together with the right to use and enjoy said property except for the purposes herein granted, including but not limited to, the right to cross over said lands at an angle of no less than 45 degrees with black top or cement roads of width required by Salt Lake County in the subdivision of Grantor's remaining lands, and to cross over said lands at an angle of no less than 45 degrees with curb, gutter, sidewalks, water lines, sewer and gas lines and railroad tracks, together with the right of reasonable ingress and egress for the purposes of installation, operation and maintenance thereof, and reserving further unto said Grantor the right to landscape said land with lawns and low shrubs and to use the same for general agricultural purposes, provided, however, that none of the rights reserved in this paragraph by Grantor shall in any way hinder, conflict or interfere with Grantee's surface or subsurface rights hereunder or disturb its facilities; provided further that the plans of the Grantor for the establishment of parking facilities, roads, curbs, gutters, sidewalks, water lines, sewer and gas lines and railroad tracks must be submitted in writing to Grantee, for Grantee's written approval, which shall not be unreasonably withheld, forty-eight (48) hours prior to commencement of construction; and provided further that all use by Grantor of the rights herein reserved shall in all respects conform to the requirements of the Kern River Encroachment Specifications and/or U.S. Department of Transportation Regulations in effect at the time of such use; and provided further that all reservations contained herein shall be deemed to be cumulative and not restrictive. (9) The parties executing this Right-of-way and Easement Agreement on behalf of their principals, covenant and warrant that they have full authority to act on behalf of their principals and bind said principals hereto. Neither Grantor nor Grantee are bound to any covenant or agreement not herein expressed.
