- ### NOTES
- The purpose of this survey is to provide an ALTA/ACSM Land Title Survey of the area shown hereon for the clients own intents and purposes.
 - The Basis of Bearing for this survey is N89°51'47"E along the Section Line from the South 1/4 Corner to the Southeast Corner of Section 11, Township 5 South, Range 1 West, Salt Lake Base and Meridian. Deeds and plats of record have been related to the above mentioned basis of bearing.
 - A title report prepared by Cottonwood Title Insurance Agency, Inc., Order Number: 81154-DP, Effective Date: December 16, 2015 was used in the preparation of this survey and LEI Consulting Engineers and Surveyors, Inc. is entitled to rely on the accuracy of those reports, and is not liable for errors and omissions based on the reliance of said title reports. All easements and title exceptions shown hereon are referenced from said report.
 - Parcel No. 58-025-0001 appears to be a remainder description of that property that was described in Deed Entry No. 12445-1965 (owned by Rulon Alfred). Scott Mclachlan acquired all of Rulon Alfred's interest in this parcel by Quit Claim Deed Entry No. 12616-1982 (this deed has the same historic description of the Alfred Property that was described by Deed Entry No. 12445-1965 even though Scott Mclachlan had already acquired portions of this property by Deed Entry No. 17399-1977 and Entry No. 46954-1979). It appears from the record deeds that Rulon Alfred accepted the existing fence line as his south boundary line based upon the fact that he sold his property by Warranty Deed up to that fence line. The area of his original deed that was south of the fence he conveyed by Quit Claim Deed, and did not do this until about five years after the property north of the fence had been conveyed. It appears that the boundary would be fixed along the fence line by rules of acquiescence. It is the opinion of this surveyor that the owner of this property seek legal counsel to resolve this area of conflict.
 - Exception #26 includes Warranty Deeds for portions of the property for canals as shown hereon. It appears that the canals have been abandoned but there may still be rights of ownership held by the irrigation companies or their assigns or heirs.
 - The benchmark for the topographic information provided hereon is the found 1958 Brass Monument at the South 1/4 Corner of Section 11, T5S, R1W, SLB&M, with an NGVD29 Elevation of 4,518.08 feet. Contours are shown hereon at two (2) foot intervals.
 - #5 rebar and cap have been set at all boundary corners unless noted otherwise.
 - This survey does not guarantee, grant, transfer or imply fee title ownership of any portion of this property in whole or part to any party or persons. This survey makes reference to owners names, documents and deed lines which are depicted hereon to the best of the surveyor's ability, however all information shown hereon should be verified by county records, title companies and other qualified professionals to meet the specific purposes and intents of the client. Furthermore, the filing of this survey with the respective county in which the property is situated does not serve as an instrument to subdivide, transfer, sell, or trade any portion of the property shown hereon. It is recommended that a qualified title company and/or other qualified professionals be contacted to address any and all questions regarding property ownership, title and the transfer of real property.
 - This drawing, its design, and invention thereof, is the property of LEI Consulting Engineers and Surveyors, Inc. and is submitted to, and is for the exclusive use of, the client referenced on the Survey. Only copies authorized in writing and individually signed and sealed by the Surveyor may be used as the official work of the Surveyor. This drawing and any copy thereof may not be relied upon for any purpose, by any party, except as stated in the agreement between LEI Consulting Engineers and Surveyors, Inc., and its client.
 - This drawing and any copy thereof, may also not be relied upon for any purpose under any of the following conditions:
 - Original and any copies not individually signed and sealed by Surveyor.
 - Dependent monuments and data set, or published, by others and used by the Surveyor are subsequently found to be in error.
 - Improvements shown have been altered, changed, or added to, subsequent to the Survey.
 - Except as specifically stated or shown on this plan, this survey does not purport to reflect any of the following which may be applicable to the properties shown hereon: easements, encumbrances, building setback lines, restrictive covenants, subdivision restrictions, zoning or other land use restrictions and any other facts that an accurate and current title search may disclose. Regarding any issues not specifically stated or shown on the survey, client is advised to seek the services of a competent title company.
 - Underground utilities have been shown hereon based on observed evidence at the time of this survey. Additional underground utilities including but not limited to: power, phone, cable TV, water, sewer and sprinkler lines may exist within the boundaries of this survey and blue stakes should be contacted prior to digging or in order to add the locations of such utilities to this survey. Engineers, contractors, and others that rely on this information should be cautioned that the locations, elevations, and pipe sizes of the existing utilities may not be relied on as being exact or complete. Additional exploration, verification and relocation of existing utilities will be the sole responsibility of the contractor prior to or during construction of any additional improvements.
 - This property is within three (3) separate flood zones as shown hereon, scaled in from the FIRMS maps indicated below: Flood Zone "X" (areas outside the 500-year flood-plain), Flood Zone "X" (Shaded) (areas of 500-year flood; 100 year flood with average depth of less than 1 foot or with drainage area less than 1 square mile; areas protected by levees from 100-year flood) and Flood Zone "AE" (base flood elevations determined) according to the Flood Insurance Rate Map Panel 4902090115 C, Effective Date: July 17, 2002 and Map Panel 4902090105 C, Effective Date: July 17, 2002.
 - There is no observable evidence that this site has been used as a solid waste dump, sump or sanitary landfill.
 - There was no wet-land delineation of the property performed by a qualified authority at the time that the field work was completed. No wet lands have been shown hereon, but they can be added when a delineation of this property has been completed.
 - This survey has been updated to reflect the boundary after the recording of several boundary line agreements. No additional field work was completed since the original survey Dated: March 24, 2016.
