NOTE: Bearings of the boundary lines of the subdivisions within Section 16 differ slightly from those on the recorded plats. The subdivisions used various basis of bearings, which differed from the record, from each other, and from those in Section 9. In order to bring all of the boundaries into conformity with each other and the record Section line bearings, each one was rotated slightly to match a single basis of bearing – that of the line between the North Quarter Corner and the Northwest Corner of said Section 16, which bears South  $89^{\circ}41'57''$  West. A couple of the subdivisions used the line between the North Quarter Corner and the Northeast Corner of said Section 16, which bears North  $89^{\circ}41'57''$  East. The bearings of these boundaries were rotated to match the neighboring subdivision boundaries, which then matched this Section line bearing within a few seconds.

into conformity with each other and the record Section line bearings, each one was rotated slightly to match a single basis of bearing – that of the line between the North Quarter Corner and the Northwest Corner of said Section 16, which bears South  $89^{\circ}41'57''$  West. A couple of the subdivisions used the line between the North Quarter Corner and the Northeast Corner of said Section 16, which bears North  $89^{\circ}41'57''$  East. The bearings of these boundaries were rotated to match the neighboring subdivision boundaries, which then matched this Section line bearing within a few seconds.
