III. INFRASTRUCTURE, DEDICATIONS AND FEES

3.1. Compliance With Water Utilities Ordinance.

3.1.1. Water Rights for Development. Developer shall acquire from or convey to the City water rights sufficient for the development of Developer's Land as provided in the Master Development Plan in accordance with the City's Water Utilities Ordinance. Such water rights for culinary water requirements must be purchased from or through the City unless the City agrees to other arrangements in advance. Developer either will purchase secondary water rights through the City or with prior approval of the City will acquire and convey to the City water rights from other parties to meet the secondary water right requirements for development of Developer's Land. Such water rights for culinary water requirements must be approved for municipal uses with approved sources from a well or wells at location(s) designated by the City. Water rights for secondary water requirements must be approved for municipal and/or irrigation uses with approved sources approved by the City. Prior to acceptance of the water rights that Developer proposes to convey to the City without purchasing the same from or through the City, the City shall evaluate the water rights proposed for conveyance and may refuse to accept any right which it determines to be insufficient in annual quantity or rate of flow or has not been approved for change to municipal purposes within the City by the Utah State Engineer. In determining the quantity of water available under the water right proposed to be conveyed to the City, the City will evaluate the priority of the water rights and the historic average quantities of water available to the water rights as determined by the State Engineer. Developer shall reimburse the City for the costs of the City's consultants to review the water rights proposed for conveyance to the City. If not previously so approved, the City will require an approved application for change of use and/or change of point of diversion to a source approved by City, as applicable, by the State Engineer in order to quantify and verify the water rights prior to final plat approval for any development to be served by said water rights. In the event such applications are filed in the City's name, the City may require its consultants to be involved in the administrative proceedings and any subsequent legal proceedings and Developer shall reimburse the City for the fees of such consultants. Any water rights that the Developer currently proposes to convey to the City, as well as the agreed arrangements for review and approval of such water rights, are set out in Exhibit D-1 to this Agreement.

3.1.2. Water Facilities for Development. Developer shall acquire from or convey to the City water facilities or water facilities capacities, including water sources and storage and distribution facilities, sufficient for the development of Developer's Land as provided in the Master Development Plan in accordance with the City's Water Utilities Ordinance. Culinary water service will be provided to the Developer's Land by water facilities owned by the City. Unless other arrangements are agreed to by the City and the Developer, Developer shall acquire culinary water facilities to meet this requirement by paying to the City the water connection fee being charged by the City. Such culinary water connection fee may be paid at the time a building permit is issued for the development pursuant to the Master Development Plan. Secondary water service will be provided to the Developer's Land by water facilities owned by the City. The City does not currently have water facilities necessary to provide secondary water service to Developer's Land. Developer may be required to assist in building water facilities for secondary water service by prepaying secondary water connection fees. If the City is unable to construct water facilities to provide secondary water service to Developer's Land without further assistance from Developer, Developer will either have to assist the City further in construction of secondary water facilities or delay development of Developer's Land until the City is able to build water facilities capable of providing secondary water service to Developer's Land. In the event that Developer is required to assist in the construction of water facilities beyond the amount of its total secondary water connection fees and

such secondary water facilities will also benefit other development in the City, the City will require the other benefited developments to reimburse Developer or otherwise bear their share of such excess costs on a basis hereafter agreed between the Developer and the City at the time such secondary facilities are constructed. In lieu of delaying development of Developer's Land because the City is not able to build water facilities capable of providing secondary water service to Developer's Land, Developer may, with the consent of the City, purchase sufficient culinary water connections to provide for the secondary water requirements for the development of Developer's Land. In the event that Developer purchases culinary water connections for its secondary water requirements, Developer shall not be entitled to any credit, reimbursement or return of the culinary connections utilized for secondary water purposes in the event the City subsequently builds water facilities capable of providing secondary water service to Developer's Land.

The addition of Developer's land will be with the consent of the Developer after the City Council finds that inclusion of the lots in the subdivision on Developer's Land will not adversely affect the owners of properties already within the Lighting SID. Developer's consent Developer's Land being included in the Lighting SID will be a condition to final plat approval for the subdivision of Developer's Land. The Lighting SID is not for the installation of street lights but is for the maintenance of the street lights that Developer will be required to install as part of the subdivision improvements required by the City.

3.3. Capacity Reservations. Any reservations by the City of capacities in any facilities built or otherwise provided to the City by or for Developer shall be for development covered by the Master Development Plan. All capacity reservations for development covered by the Master Development Plan shall terminate as soon as such development loses its approved status for failure to develop within the time allowed under this Agreement or for any other reason. The Capital Facilities Charge is currently collected by the City but may hereafter be collected directly by Timpanogos and may hereafter be collected as a Capital Facilities Charge or as an impact fee. Developer acknowledges and agrees that said Capital Facilities Charge or impact fee by Timpanogos is separate from and in addition to sewer connection fees and sewer impact fees imposed by the City and that payment of the Timpanogos Capital Facilities Charge and the impact fee and connection fees imposed by the City for each connection is a condition to the City providing sewer service to the lots, residences or other development covered by the Master Development Plan.
