

DOUG CROFTS
WEBER COUNTY RECORDER
DEPUTY

Dec 17 3 42 PM '84

FILED

WOLF CREEK WELL NO. 1

926009

State of Utah Public Drinking Water Regulation 6.3.4 Protection Zone is as follows:

All land at elevations equal to or higher than, and within 1,500 horizontal feet of, the spring source must be protected against the establishment of concentrated sources of pollution.

All land at an elevation lower than, and within 100 horizontal feet of, the spring must also be so protected. The elevation datum to be used is the point of water collection.

To insure that such protection is available, the water supplier must either

1. own the protection zone and agree not to locate or permit concentrated sources of pollution within it, or
2. if the water supplier does not own the land in question, he must achieve a land use agreement with the owner(s) of the land by which the land owner agrees not to locate or permit concentrated sources of pollution within the protection zone.

In both of the above situations, the restriction must be binding on all heirs, successors and assigns.

The term "concentrated sources of pollution" includes septic tanks, drain fields, garbage dumps, pit privies, drain lines, sewer lines, corrals, etc.

Said Agreement is on property described as follows:

A part of Section 22, Township 7 North, Range 1 East, Salt Lake Base and Meridian, U.S. Survey:

A 100 foot radius Protection area, centerpoint described as follows:

South 1074.06 feet and West 458.99 feet from the center of said Section 22.

Dated this 14th day of December, 1984.
