EASEMENT NO. 1988

## GRANT OF RECIPROCAL RIGHT-OF-WAY

THIS GRANT OF RECIPROCAL RIGHT-OF-WAY ("**ROW Agreement**") is made this 7<sup>th</sup> day of May, 2015 ("**Effective Date**") by and between RICK GATHERUM ("**Gatherum**"); UTAH DIVISION OF WILDLIFE RESOURCES ("**Division**"); and the STATE OF UTAH, acting by and through the SCHOOL AND INSTITUTIONAL TRUST LANDS ADMINISTRATION ("**SITLA**") (individually a "Party" and collectively "Parties").

### RECITALS

- A. Gatherum is the owner of certain lands situated in Carbon County identified on Exhibit A ("**Gatherum Property**").
- B. SITLA manages certain trust lands located adjacent to the Gatherum Property, more particularly described as Section 36, Township 12 South, Range 8 East, SLB&M and Section 2 (less the SE1/4 of the SE1/4), Township 13 South, Range 8 East, SLB&M, and as depicted in Exhibit A ("**SITLA Property**").
- C. SITLA and Gatherum agree to grant the other, a perpetual right-of way across their respective properties, without charge, under the conditions stated herein.
- D. The Division holds a perpetual conservation easement ("**Conservation Easement**") on the Gatherum Property that restricts, among other things, certain commercial activities, surface disturbing activities, and new road construction.
- E. The Conservation Easement granted to the Division on December 18, 2002 and recorded in the Carbon County Recorder's Office at Entry # 098257, Book 531, Page 643, is attached as Exhibit B, incorporated herein by reference and made a part hereof.
- F. The Parties acknowledge and agree that the right-of-way on the Gatherum Property ("**SITLA ROW**") is granted subject to the terms and conditions of the Conservation Easement.

NOW, THEREFORE, for Ten Dollars and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

## AGREEMENT

1. Right-of-way Across the SITLA Property. Subject to the terms and conditions hereafter described, SITLA hereby grants and conveys to Gatherum, his permittees, lessees, successors, and assigns a perpetual, non-exclusive right-of-way ("**Gatherum ROW**") over and upon the existing unimproved road crossing the SITLA Property in:

a. Ciochetto Canyon, specifically Section 36, Township 12 South, Range 8 East, SLB&M, as depicted in Exhibit A; and

b. Burnt Tree Fork of Spring Canyon, specifically Section 2, Township 13 South, Range 8 East, SLB&M, as depicted in Exhibit A.

2. Right-of-way Across the Gatherum Property. Subject to the terms and conditions hereafter described, Gatherum hereby grants and conveys to SITLA, its permittees, lessees, successors, and assigns a perpetual, non-exclusive right-of-way ("**SITLA ROW**") over and upon the existing unimproved road crossing the Gatherum Property in:

a. Ciochetto Canyon, specifically Section 1, Township 13 South, Range 8 East, SLB&M and Section 35, Township 12 South, Range 8 East, SLB&M, as depicted in Exhibit A; and

b. Burnt Tree Fork of Spring Canyon, specifically Section 1, Township 13 South, Range 8 East, SLB&M and Section 35, Township 12 South, Range 8 East, SLB&M, as depicted in Exhibit A.

3. Purpose and Use of the Gatherum Right-of-Way. The Gatherum ROW is granted for the purpose of allowing Gatherum and his successors, assigns, permittees and lessees to use the described dirt roads crossing the SITLA Property for access to adjoining lands owned by Gatherum.

a. The Gatherum ROW shall not exceed ten (10) feet in width and may be used as a roadway for vehicular and non-vehicular travel uses compatible with the current width, unimproved condition, and the historic ranching and recreational uses of the existing road.

b. Gatherum may maintain the Gatherum ROW, at his sole expense, to preserve or restore its basic travel functionality. Notwithstanding this maintenance right, the roads constituting the Gatherum ROW may not be widened, realigned, trenched, or surfaced with asphalt or any other impermeable material.

c. The Gatherum ROW is granted exclusively for vehicular and non-vehicular travel uses to access the noncontiguous parcels of the Gatherum Property, and it may not be used as a corridor for any type of above or below ground utilities, including electricity, gas, oil, communications, satellite, water, sewer, etc.

d. The Gatherum ROW may be blocked by locked gates generally located where the right-of-way crosses the east and north section lines of Section 2, Township 13 South, Range 8 East, SLB&M and the south and west section lines of Section 36, Township 12 South, Range 8 East, SLB&M or at other reasonable locations on the right-of-way. SITLA agrees to provide Gatherum and the Division with keys and/or combination to any gate installed on or blocking access to the Gatherum ROW, or allow Gatherum and/or the Division to place their own locks on said gates in addition to any locks placed by SITLA.

e. It is not the intent of the parties to establish the Gatherum ROW as a public easement or right-of-way, now or in the future.

f. Gatherum will provide SITLA and the Division no less than 14 days prior notice pursuant to Paragraph 11 of this ROW Agreement before:

i. assigning or transferring any right or use herein granted by the Gatherum ROW to a third-party, including successors, assigns, permittees and lessees; or

ii. performing any maintenance or roadwork on the Gatherum ROW.

4. Purpose and Use of the SITLA ROW. The SITLA ROW is granted for the purpose of allowing SITLA and its successors, assigns, permittees and lessees to use and travel upon the described dirt roads crossing the Gatherum Property for access to adjoining lands owned by SITLA.

a. The SITLA ROW shall not exceed ten (10) feet in width and may be used as a roadway for vehicular and non-vehicular travel uses compatible with the current width, unimproved condition, and the historic ranching and recreational uses of the existing road.

b. SITLA may maintain the SITLA ROW, at its sole expense, to preserve or restore its basic travel functionality, consistent with the Conservation Easement, provided that nothing herein shall preclude SITLA's exercise of any eminent domain rights under Utah law. Notwithstanding this maintenance right, the roads constituting the SITLA ROW may not be widened, realigned, trenched, or surfaced with asphalt or any other impermeable material.

c. The SITLA ROW is granted exclusively for vehicular and non-vehicular travel uses to access the SITLA Property, and it may not be used as a corridor for any type of above or below ground utilities, including electricity, gas, oil, communications, satellite, water, sewer, etc.

d. The SITLA ROW may be blocked by locked gates generally located at the terminus of the county-maintained portion of Spring Canyon road located within the SW $\frac{1}{4}$ SE $\frac{1}{4}$  of Section 1, Township 13 South, Range 8 East, SLB&M, or at other reasonable locations on the right-of-way. Gatherum agrees to either provide SITLA and the Division with keys and/or combination to any gate installed on or blocking access to the SITLA ROW or allow SITLA and/or the Division to place their own locks on said gates in addition to any locks placed by Gatherum.

e. It is not the intent of the parties to establish the SITLA ROW as a public easement or right-of-way, now or in the future.

f. SITLA will provide Gatherum and the Division no less than 14 days prior notice pursuant to Paragraph 11 of this ROW Agreement before:

i. assigning or transferring any right or use herein granted by the SITLA ROW to a third-party, including successors, assigns, permittees and lessees; or

ii. performing any maintenance or roadwork on the SITLA ROW.

5. Relocation. Gatherum and SITLA individually reserve the right to relocate or modify, in whole or in part, the right-of-way encumbering its property as may be necessary to satisfy its interest in using its property or adjoining lands. The cost of such relocation shall be born exclusively by the fee owner of the property where the right-of-way is located. The relocated or modified right-of-way shall provide the Party benefited by the right-of-way with substantially equivalent access as was provided prior to the relocation. The Parties recognize that the Gatherum Property is encumbered by the Conservation Easement held by the Division, which restricts surface disturbing activities on the property, including road modifications and construction. Notwithstanding the provisions of this paragraph, Gatherum and SITLA acknowledge and agree that the SITLA ROW may not be modified or relocated without prior notice to and express authorization from: 1) the Division pursuant to Section IV of the Conservation Easement; and 2) the U.S. Fish and Wildlife Service pursuant to the grant agreement that funded acquisition of the Conservation Easement.

6. Rights-of-Way Run with the Land. The SITLA ROW and the Gatherum ROW shall be perpetual in nature and run with the land.

7. Successors and Assigns. This ROW Agreement shall be binding upon and shall inure to the benefit of the respective successors and assigns of SITLA and Gatherum. Gatherum and SITLA each acknowledges that the other shall have the right, exercisable from time to time, to assign the non-exclusive use of its respective right-of-way to third parties and their successors and assigns.

8. Venue. Each Party acknowledges and agrees for itself and its successors and assigns that any suit brought by any Party, its successors or assigns concerning this ROW Agreement may be maintained only in the Utah State District Court of Salt Lake County.

9. Non-Exclusive. It is expressly understood and agreed that the rights-of-way herein granted are non-exclusive and that both Gatherum and SITLA expressly reserve the right to issue other non-exclusive rights-of-way, easements, leases, or permits on or across their respective properties where such uses are appropriate and compatible with the rights granted herein.

10. Third Party Interests. Nothing herein shall be construed as creating third party beneficiary rights vested in the public, individually or as a body, or in any other person or entity not a party to this ROW Agreement or a successor in interest to a party.

11. Notice. Any notice contemplated herein to be served upon Gatherum, the Division, or SITLA shall be in writing and shall be deemed sufficient if deposited in the Utah States mail, postage prepaid and certified or registered, and addressed as follows:

SITLA:

School and Institutional Trust Lands Administration  
675 East 500 South, Suite 500  
Salt Lake City, UT 84102

Gatherum:

Richard G. Gatherum

Division:

Utah Division of Wildlife Resources  
Attn: Habitat Section Chief  
1594 West North Temple, Suite 2110  
Salt Lake City, Utah 84114

12. Utah Law. This ROW Agreement shall be interpreted and governed by the laws of the State of Utah and the provisions hereof shall inure to and be binding upon the successors and assigns of the Parties.

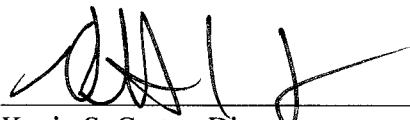

13. Conservation Easement. Gatherum and SITLA acknowledge and agree that the Gatherum Property and the SITLA ROW granted herein are encumbered by the Conservation Easement held by the Division, and that nothing herein shall be construed as waiving the Division's right and obligation to protect the conservation values of the Gatherum Property under the terms of the Conservation Easement, or as authorizing any use or activity on the Gatherum Property contrary to the terms of said easement.

14. Liability. Gatherum, as "Grantee", with respect to the Gatherum ROW, and SITLA, as "Grantee", with respect to the SITLA ROW each assume liability for and agrees to indemnify the grantor of their respective right of way ("Grantor") for and against any and all liability, including attorney's fees, of any nature imposed upon, incurred by, or asserted against Grantor which in any way relates to or arises out of the activity or presence upon the Easement of Grantee, its servants, employees, agents, sublessees, assignees, or invitees, unless such liability is caused by Grantor's sole negligence.

[Signatures on Next Page]

IN WITNESS WHEREOF, SITLA, Gatherum, and the Division have caused this ROW Agreement to be executed as of the Effective Date.

DEED OF CONSERVATION EASEMENT  
(Spring Canyon)

THIS DEED OF CONSERVATION EASEMENT made as of this 18<sup>th</sup> day of December, 2002, by **DOUBLE J. TRIANGLE L.L.C.**, whose address is Post Office Box 415, Helper, Utah 84526 ("Grantor"), and the **UTAH DEPARTMENT OF NATURAL RESOURCES, DIVISION OF WILDLIFE RESOURCES** ("Division") whose address is 1594 West North Temple, Suite 2110, Salt lake City, Utah 84114;

WITNESSETH:

WHEREAS, the purpose of this Easement is to protect or enhance forever the natural wildlife habitat and open space of the real property described in attachment Exhibit A; and

WHEREAS, Grantor is the owner of all the real property in **Carbon County, State of Utah**, described in the attached Exhibit A ("**Property**") and approximately located on the map attached as Exhibit B; and

WHEREAS, the Property has significant wildlife habitat values, ecological and open space values as recognized in the Utah Land Conservation Easement Act, (Utah Code Ann. §§ 57-18-1 to 57-18-7); and Grantor intends to convey this Easement under the statutory provisions of that Act and other applicable provisions of Utah statutory and common law; and

WHEREAS, the Property constitutes a valuable element of the natural habitat of the **Spring Canyon** watershed and ecosystem and the ecosystem's ecological and open space values, including flora, fauna, and soils; the Property provides significant wildlife habitat, and the maintenance of such natural habitat helps support wildlife populations in the **Upper Price River** ecosystem. All these natural habitat, ecological, wildlife, water resource, and open space values ("**Conservation Values**") are worthy of conservation and of great importance to Grantor, the Division, and the State of Utah; and

WHEREAS, Grantor desires and intends that the Conservation Values of the Property be protected and maintained by the continuation, initiation, or introduction of activities on the Property that will not compromise the Conservation Values, including such activities as ranching, hunting, fishing, hiking, camping, various winter activities such as snowmobiling, 4-wheeling on the existing roads, tubing, cross-country skiing, and equestrian uses ("**Primary Uses**"); and

WHEREAS, Grantor, as the fee owner of the Property, holds the right to identify, conserve, enhance, and protect in perpetuity the Conservation Values of the Property; and

WHEREAS, Grantor desires and intends to transfer certain of such rights to the Division, provided Grantor's right to use the Property for the Primary Uses is also protected and conserved in the manner set forth in this Easement; and

WHEREAS, the State of Utah has recognized the importance of both public and private efforts to conserve and protect the state's natural resources by the enactment of Utah Code Ann. §§ 57-18-1 to 57-18-7; and

WHEREAS, the Division undertakes the responsibility to conserve and protect natural areas and significant wildlife habitat for ecological, scientific, recreational, and educational purposes; and the Division is a non-profit, tax exempt organization under Section 501(c)(3) of the Internal Revenue Code, and a qualified conservation easement holder under Utah Code Ann. § 57-18-3; and the Division is a qualified organization under Section 170(h)(3) of the Internal Revenue Code to receive and hold conservation easements; and

WHEREAS, the Parties desire that any interpretation of this Easement be construed to further the conservation, protection, and enhancement of the Property's Conservation Values.

NOW, THEREFORE, in consideration of the mutual covenants contained herein, and pursuant to Utah Code Ann. §§ 57-18-1 to 57-18-7, and other applicable provisions of Utah statutory and common law, Grantor hereby conveys and warrants to the Division this perpetual Easement over the Property. The scope of this Easement is set forth in this deed.

#### SECTION I - RIGHTS OF THE DIVISION

The total Property owned by Grantor which will be encumbered by this Conservation Easement as described in Exhibit A and as depicted in Exhibit B. The Division recognizes that Grantor does not own the mineral estate on the entire Property and that this Easement is subordinate to all existing rights and encumbrances of record. The rights conveyed by Grantor to the Department to perpetually maintain the Conservation Values of the Property in this Easement include the following:

A. Identification and Protection. The Division has the right to identify, conserve and protect in perpetuity, and to enhance by mutual agreement the Conservation Values on the Property in the manner set forth in this Easement, subject to Grantor's reserved rights in this Easement.

B. Access. The general public is not granted access to the Property under this Easement, however, the Grantor and the Division agree to share big game hunting opportunities, licenses, tags or permits on the Property on the basis of a minimum of 1/3 of each hunting opportunity being available to the public. Public hunters shall be selected by DWR. It is further agreed that public hunters, and one or two hunting companions accompanying each hunter, shall be granted free access to the Property and surrounding or adjacent public lands otherwise open to hunting, free of charge. Public hunters are required to contact the landowner to obtain permission and instructions on use and protection of resources on the Property. If the Property is licensed as a Cooperative Wildlife Management Unit, the rules and policies governing that

program will prevail on the Property except that the Parties agree to equally share hunting opportunities as noted above. The Division has the right to enter upon the Property to inspect, monitor, and enforce compliance with this Easement at reasonable times. The Division also has the right to enter upon the Property with advance notice and permission from Grantor or Grantor's agent to observe or study the natural resources protected by this Easement in a manner that will not unreasonably interfere with the use of the Property by Grantor.

The Division shall have the unilateral right of immediate entry upon the Property if, in the Division's sole judgement, such entry is necessary to prevent immediate damage or destruction to the Conservation Values of this Easement.

C. Conservation, Enforcement, Injunction, and Restoration. The Division has the right to prevent any activity on, or use of the Property that is inconsistent with this Easement. The Division is entitled to take any legal action to prevent such activity, including but not limited to, obtaining an injunction in a court of competent jurisdiction. The Division further has the right to enforce the reasonable restoration of such areas or features of the Property damaged or impaired by any activities or omissions to prevent such activities inconsistent with this Easement. The Division and Grantor each shall be entitled to recover its reasonable attorney's fees in enforcing its rights under this Easement.

D. Signs. The Division has the right to place signs on the Property to identify it as being protected by this Easement. The number and location of the signs are subject to Grantor's approval, which will not be unreasonably withheld.

## SECTION II- GENERAL EFFECT OF EASEMENT

A. Perpetual Restrictions. This Easement shall run with and encumber the title to the Property in perpetuity and shall bind Grantor and all future owners, assigns, and tenants of the Property.

B. Permitted Uses in General. This Easement shall confine the use of the Property to activities such as the Primary Uses or Permitted Uses, consistent with the purposes and terms of this Easement. Any activity by the landowner or his employees or designees on the property or any use of the Property by the landowner or his employees or designees that is inconsistent with the purposes or terms of this Easement or detrimental to the Conservation Values expressed in this Easement is expressly prohibited.

C. Dedication of Property. Pursuant to the terms of Utah Code Ann. §§ 57-18-1 to 57-18-7, the Property conserved by this Easement, as described in Exhibit A and B, is declared open space and natural land, and may not be converted or directed to any uses other than those provided in this Easement.

Ent 828468 Bk 843 Pg 538

SECTION III - PERMITTED USES AND PRACTICES

The following uses and practices, while not an exhaustive recital of permitted uses and practices, are consistent with this Easement. The uses and practices described in this section may not be precluded or prevented by this Easement, except under the following circumstances. The uses and practices may be precluded when this Easement requires the Division's prior approval of an activity as provided in Section IV of this Easement or when such uses or practices are conducted or allowed to take place in a manner which violates the terms of this Easement, poses a serious threat of material damage to the Conservation Values protected by this Easement, or constitutes a prohibited use or practice as set forth in Section V of this Easement.

A. Residential or Recreational Facilities. The Grantor retains the right to construct up to six single-family homes and associated structures and outbuildings for personal family use on 6 three acre building sites located adjacent to the existing road. One of these building sites may consist of no more than 40 acres provided that 37 contiguous acres of the parcel remain encumbered by this Easement. ~~The exact location of the building envelopes, the location of the structure(s) within the building envelopes, the materials used in construction, and etc. will be as mutually agreed by the Parties prior to construction.~~ <sup>To Be Determined by Seller</sup> Until such time as the building envelopes are selected and described, the property will be managed as Easement Property along with the Property identified by this Easement. Fee title to the 37 acres (within the 40 acre parcel specified in this paragraph) may be transferred to any fee purchaser of the 3-acre building site. However the said 37 acres will remain subject to this Conservation Easement. *RB*

B. Ranching Facilities. Grantor may maintain, replace, and repair, for ranching and recreational purposes, the fences, roads, and other improvements located on the Property as of the date of this Easement, as identified in the baseline inventory referred to in Section X. Grantor may maintain, replace, and repair the existing fences, roads, and other improvements identified in the baseline inventory referred to in Section X, as may be necessary for ranching and the other uses permitted by this Easement, provided such fence, road, corral, barn, shed, or improvement is maintained, replaced or repaired in its original approximate size and general location. If any or all of such facilities are removed or destroyed, Grantor may replace them with similar structures of the same approximate size in the same general location.

Grantor may construct additional fences, roads, corrals, barns, and sheds as may be necessary for ranching and the other agricultural uses permitted by this Easement upon prior written approval by the Division, as provided in Section IV of this Easement. Grantor may construct fences along the exterior border of the Property without prior approval of the Division. Drift fences may be constructed as necessary to control drifting snow. Big game proof fences are permitted around harvested crops (e.g. haystacks) or domestic gardens. No other big game proof fences will be constructed on the Property or on the exterior boundary of the Property.

Replacement or repair of existing fences within the Property boundaries and construction of new fences on the Property's exterior boundary shall be constructed in such a manner and with such materials as not to unduly endanger wildlife safety or to materially inhibit wildlife

movement. The Division's prior written approval, consistent with Section IV of this Easement, must be obtained prior to replacing, repairing, or constructing any fencing on the Property that may unduly endanger wildlife safety or materially inhibit wildlife movement.

C. Ranching and Farming Activities. Grantor may use the Property for historical or common ranching and farming activities, including grazing, feeding, breeding, raising, and managing livestock, provided these activities do not materially jeopardize the wildlife habitat values. Generally, the term "livestock" includes traditional livestock.

D. Subdivision. The Property may be subdivided into no more than three parcels provided that no one parcel shall be smaller than 320 acres. Further division or subdivision of the Property is prohibited except as permitted in Section III.A.

E. Livestock Grazing. Good range stewardship and proper management of domestic livestock are integral to the conservation goals of this Easement. Livestock grazing shall not exceed a degree of use described as Moderate Use (for Spring Grazing) or Full use for all other grazing seasons by the United States Department of Agriculture - Natural Resource Conservation Service, as identified in Exhibit C attached hereto, and shall not materially degrade or deteriorate the range resource and wildlife habitat. The Property is utilized as a forage base for wildlife, therefore, all domestic livestock grazing activity will be governed by a Grazing Management Plan ("GMP") prepared by a qualified natural resource specialist(s) and reviewed and approved by the Division, as provided in Section IV. The Division reserves the right, at its sole cost, to have consultants or employees, including range scientists, fisheries biologists, hydrologists, ecologists, foresters, and wildlife biologists review the GMP and make on-site evaluations to provide recommendations to the Division.

The GMP shall be prepared, completed, and incorporated into this Easement as Exhibit C. The GMP may be modified following the execution of this Easement where changing needs and uses precipitate grazing practice changes, or when required or desirable to ensure compliance with the terms of this Easement and protection of the Conservation Values identified therein. The GMP will consider the long-term health of the range resource and wildlife habitat. The GMP will describe appropriate use levels, seasons of use, kinds of livestock that will be grazing and necessary management practices. The GMP must meet all applicable state and federal laws, policies, guidelines, and regulations.

F. Hunting and Fishing. Hunting, trapping and fishing are permitted on the Property only to the extent such activities are consistent with state and federal laws and regulations. The intent of this provision is to permit levels of hunting, trapping and/or fishing which are not detrimental to sustainable levels of wildlife and fish populations. The Parties agree and acknowledge that hunting may be a desirable management tool to balance wildlife numbers with range and habitat condition.

G. Water Resources. Grantor may improve water resources on the Property if such improvement is necessary or beneficial to grazing livestock, wildlife, or fisheries on the Property.

Such improvements must be consistent with the terms of this Easement and the Conservation Values protected therein, as well as comply with all applicable laws and regulations. Such improvements include dug-out development and watering tank installation, provided the improvement does not result in any water pollution having a detrimental effect on fish, aquatic life, wildlife, their habitat, or their passage.

Upon approval by the Division as required in Section IV of this Easement, Grantor may also carry out activities to restore and enhance aquatic, terrestrial, and wetland habitat for fish and wildlife use and production. Such activities may include stream bank stabilization, improvement to the quality and quantity of water available, and development of watering facilities and ponds; provided such activities are conducted in a manner consistent with accepted waterway stabilization, rehabilitation, and enhancement methods, state and federal laws and regulations, and the terms and intent of this Easement.

Water usage or distribution on the Property shall not be altered in such a manner as to compromise the terms of this Easement or the Conservation Values protected therein, as identified in the Baseline Inventory.

H. Agrichemicals and Biological Controls. Grantor may use agrichemicals and biological controls on the Property, including but not limited to insects, fertilizers, biocides, herbicides, pesticides, insecticides and rodenticides. Agrichemical and biological controls may only be used in accordance with all applicable laws, and in those amounts and with that frequency of application constituting the minimum necessary to accomplish reasonable ranching and grazing objectives. The use of such agents shall be conducted in a manner to minimize any adverse effect on the natural values of the Property and to avoid any impairment of the natural ecosystems and their processes.

I. Predators. Grantor may use legal methods to control predatory and problem animals as permitted by state and federal laws.

J. Forest Management. Maintenance of a healthy forest and tree cover is integral to wildlife, wildlife habitat, values of this Easement. All activities affecting the forest and tree cover will be conducted in a manner that maintains long-term forest health and sustains and perpetuates the mix of naturally occurring species in representative ages and group sizes, in accordance with good and sound silvicultural practices and with best management practices. Consistent with these recognitions, Grantor may: 1) cut trees for posts and poles for use on the Property; 2) cut and gather dead, dying and down trees for firewood for personal use on the Property; and 3) cut or prune trees and brush, which constitute a hazard to persons, property, or roads.

All other proposed timber harvesting, including the cutting and removal of trees to abate disease or infestation, to perpetuate a healthy forest, or to provide or enhance diverse habitat for wildlife, will be conducted in accordance with the approved Timber Management Plan (TMP) prepared by a qualified natural resource manager. The Division reserves the right to have

consultants or employees such as professional botanists, biologists, hydrologists, ecologists, zoologists, foresters, etc. review the TMP and make on-site evaluations to provide recommendations to the Division. Such review shall be at the Division's sole cost and expense.

The TMP will encompass the long-term management objectives for the forested land which will include providing diverse wildlife habitat, perpetuating healthy forest conditions, maintaining scenic qualities, and abating erosion. Timber harvest activity will be undertaken at times and by methods that minimize disruption and adverse impact to wildlife using the Property. All applicable state and federal forestry laws, plans, practices, guidelines and regulations must be satisfied. The TMP may incorporate requirements from forest practice regulations in other states or jurisdictions as enforceable contractual provisions between the parties.

K. Residual Rights. Except as expressly limited by this Easement, Grantor may exercise and enjoy all rights as owner of the Property, including the right to use the Property for any purpose not inconsistent with this Easement.

#### SECTION IV - PRIOR APPROVAL OF ACTIONS BY DIVISION

If any provision of this Easement requires Grantor to obtain the Division's approval prior to performing any act or undertaking any enterprise, Grantor shall not perform that act or undertake that enterprise until the notice and approval provisions of this Section have been fully satisfied. Nothing in this Section shall in any way prohibit or limit the Division's ability to obtain writs or injunctive relief relating to any violation of this Easement.

A. Grantor's Written Notice. Prior to the commencement of any activity, use or enterprise which requires the Division's approval, Grantor will first notify the Division in writing of the proposed activity, use or enterprise. The notice must fully inform the Division of all material aspects of the proposed activity, use or enterprise. Grantor will send such notices to the Division by registered or certified mail, return receipt requested, addressed to the Utah Division of Wildlife Resources at P.O. Box 146301, 1594 West North Temple, Salt Lake City, Utah 84114-6301, Attention: Habitat Section, or to such other address as the Division may designate in writing.

B. Division's Response. The Division shall have forty five (45) days from the date such notice is received (as indicated by the registered or certified return receipt) to review the proposed activity, use, or enterprise and to notify Grantor of any objections it may have to the activity, use, or enterprise. The objections, if any, shall be based upon the Division's opinion that the proposed activity, use or enterprise is likely to cause material damage to the Property's Conservation Values or is otherwise inconsistent with the purpose and/or provisions of this Easement. If, in the Division's judgment, the proposal presented by Grantor can be modified to avoid material damage to the Conservation Values and otherwise comply with the purpose and provisions of this Easement, then the response shall inform Grantor how the proposed activity, use or enterprise may be modified to conform with this Easement. Except as provided in

Subsection C of this Section, Grantor may commence the proposed activity, use, or enterprise only after it receives the Division's express written approval, and only in the manner explicitly proposed by the Grantor and approved by the Division. The Division will send such response to Grantor by registered or certified mail, return receipt requested, addressed to Grantor at Post Office Box 415, Helper, Utah 84526, or to such other address as Grantor may designate in writing.

C. Division's Failure to Respond. If the Division fails to post its response to a proposal presented by Grantor within forty five (45) days after it receives the proposal by registered or certified mail, or within forty five (45) days after the Division has received adequate information to evaluate the proposed activity, whichever is later, then the proposed activity, use or enterprise shall be deemed consistent with the terms of this Easement, and the Division will have no further right to object to the activity, use or enterprise described in the proposal. The forty five (45) day period shall not begin to run for purposes of this paragraph until such time the Division has received adequate information from Grantor to effectively evaluate the proposed activity. In the event the Division requires additional information to evaluate the proposed activity, the Division shall request the information from Grantor as soon as practicable and in any case not later than 45 days after the receipt of the notice of the proposed activity.

D. Force Majeure. Grantor will not be obligated to send a notice to the Division, and the Division will not be entitled to bring an action against Grantor for undertaking any prudent activity in a bona fide emergency situation to prevent, abate, or mitigate the immediate threat of significant damage to the Property resulting from causes beyond Grantor's control, including fire, flood, storm, and earth movement. Grantor will promptly notify the Division of any injury to the Property caused by such events or the efforts to prevent, abate, or mitigated any damage caused by such events.

#### SECTION V - PROHIBITED USES AND PRACTICES

Any activity on or use of the Property inconsistent with the purposes of this Conservation Easement and which is likely to cause material damage to the Conservation Values is expressly prohibited. Grantor agrees that the following uses and practices, though not an exhaustive recital of inconsistent uses and practices, are explicitly deemed inconsistent with the purposes of this Easement, and shall be prohibited.

A. Commercial Facilities and Activities. Grantor will not establish or conduct any commercial or industrial facilities or activities on the Property (other than those necessary or beneficial in the operation or use of the Property expressly permitted by this Easement), including but not limited to any restaurant, night club, campground, trailer park, bed and breakfast, motel, hotel, lodge, swimming pool, gas station, retail outlet or facility for the manufacture or distribution of any product. This paragraph, nor any part of this agreement shall be interpreted as forbidding the construction and/or operation of a home for the care of troubled teens (see SECTION III, part A above) or activities associated with the care of troubled teens by the owner of the property.

B. Game Farming or Game Farm Animals. Grantor will not construct or operate a game farm on the Property, nor will Grantor raise or hold game farm animals on the Property. Game farm animals include game farm animals regulated or prohibited by the Utah Legislature, the Division of Wildlife Resources, or the Department of Agriculture and Food.

C. Wildlife Disturbance or Harassment. Harassment of wildlife on the Property by people, vehicles or domestic animals is prohibited. Legal hunting, fishing or trapping and other legitimate uses of wildlife specifically sanctioned by DWR shall NOT be considered to be wildlife disturbance or harassment.

D. Alternation of Watercourses and Topography. Grantor will not change, disturb, alter, excavate, or impair any watercourse or wetland or the topography of the ground on the Property, except as expressly permitted by Section III, Subsection G of this Easement.

E. Non-native Species. Grantor will not introduce into the general area of the Property any non-native plant or animal species other than those generally accepted for ranching, farming, residential landscaping and domestic gardening within the residential lot, except as provided for in Section III, Subsection H of this Easement.

F. Subdivision. Grantor does not have the right nor will any attempt be made to divide, subdivide, or take any action which creates an actual or *de facto* subdivision of the Property, except as expressly provided for in Section III, Subsection D of this Easement.

G. Construction. The Grantor will not construct any structures or facilities on the Property except as specifically provided for in Section III, Subsections A and B.

H. Roads. Grantor will not construct any new roads except as specifically provided for in Section III, Subsection B. Any new road construction requires the prior approval of the Division, as provided in Section IV of this Easement. Any new road approved by the Division and constructed for temporary use will be reclaimed and restored to its original condition within six (6) months following discontinued use.

I. Off-Road Vehicles. Grantor will not use vehicles off the existing roads and travelways in a manner which may result in; 1) significant soil erosion or compaction, 2) adverse impacts to the natural appearance of the Property, 3) interference with vegetation, or 4) interference with the natural habitats of animal species occurring on the Property. The parties recognize, however, that use of off-road vehicles may be necessary in ranch operations and retrieval of harvested big game animals, and such limited use is therefore expressly permitted, provided that all reasonable efforts are made to minimize any adverse impact of the use consistent with the terms and intent of this Easement.

J. Commercial Feed Lot. Grantor will not establish or maintain any commercial feed lot on the Property. For purposes of this Easement, a commercial feed lot is defined as a

permanently constructed, confined area or facility, within which the land is not grazed or cropped annually, used for purposes of engaging in the business of receiving and feeding livestock for hire.

K. Dumping. Trash, debris, ashes, sawdust, and other non-compostable refuse may not be dumped or otherwise disposed of on the Property, except that generated by normal ranching operations, and as permitted by applicable state and federal laws.

L. Utilities. Additional utility structures and systems are prohibited, unless such structures or systems are necessary for permitted ranching operations or residential/care of troubled teens uses. Absent the Division's prior approval as required in Section IV of this Easement, any additional permitted utility structures or systems must be buried and the disturbed area restored.

M. Mineral Activities. Exploration or extraction of oil, gas, rock, gravel, sand, minerals, artifacts, or other materials found in, on, or under the Property is prohibited by open-pit or surface mining methods. No sub-surface exploration or extraction of oil, gas, rock, gravel, sand, minerals, artifacts, or other materials (including the lease, sale, or other disposition of the rights to such materials) may impair or destroy the Property's Conservation Values. No mineral activities inconsistent with §170(h)(5)(B) of the Internal Revenue Code are permitted.

N. Timber Harvesting. Grantor does not have the right to harvest timber on the Property except as specifically allowed in Section III, Subsection J.

O. Raptor Nests. Grantor will not move or destroy any known or readily identifiable raptor nest at any time, regardless of its active/inactive or occupied/unoccupied status. Grantor will not cut or disturb any trees or other vegetation within 300 feet of any known or readily identifiable active raptor nest during the nesting season, or remove any crown trees or over story vegetation within 300 feet of any known or readily identifiable active raptor nest at any time. However, as specifically allowed in Section III, Subsection J, diseased trees not containing a raptor nest may be cut down and removed during the non-nesting season to abate infestations.

P. Billboards. Grantor will not construct, maintain, or erect any commercial signs or billboards on the Property. Small signs may be displayed, however, to advertise the Property for sale, to identify the Property owner, to post the Property as private, or to post the Property as protected by this Easement.

Q. Aircraft Facilities. Grantor will not construct or erect any aircraft facilities or aircraft landing facilities on the Property.

R. Cultivation or Farming. Additional sodbusting is prohibited. Sodbusting may only occur on those lands identified as cultivated or farmed lands in the Baseline Inventory referred to in Section X. Projects designed to improve, create, or maintain specific wildlife

habitats and mutually agreed to by the Parties are permitted even though some limited sod busting may result from these projects.

## SECTION VI - BREACH, RESTORATION, AND REMEDIES

A. Breach and Restoration. Where the Division becomes aware of a violation or potential violation of any restriction contained in this Easement, or becomes aware of any damage or potential damage to the Conservation Values associated with the Property, whether precipitated by Grantor or by a third party, the Division may notify Grantor in writing of such violation, potential violation, damage or potential damage. Upon Grantor's receipt of such notice, Grantor agrees to immediately take action to prevent or stop the activity which potentially or actually violates the terms or intent of this Easement.

Grantor shall have thirty (30) days after receipt of such notice to undertake actions, including restoration of the Property, that are reasonably calculated to swiftly correct the conditions caused by such violation. If Grantor fails to take such corrective action, the Division may undertake appropriate action, including legal action, to effect such corrections. The cost of such corrections, including the Division's expenses, court costs, and legal fees, shall be paid by Grantor. In the event Grantor is found not in violation of this Easement, then Grantor's legal fees shall be paid by the Division.

B. Injunctive and Other Relief. In the event Grantor undertakes or causes to be undertaken any activity on the Property that requires the Division's prior approval and such approval is not obtained consistent with Section IV of this Easement, or where Grantor undertakes or causes to be undertaken any activity in violation or potential violation of the terms of this Easement; the Division shall have the right to obtain injunctive relief or writs from courts of competent jurisdiction to stop any unauthorized activities and/or force the restoration of that portion of the Property affected by such activity to a similar or equivalent condition that existed prior to the unauthorized activity. Such restoration may include, but is not limited to, restoring soils, replanting suitable native vegetation, and/or taking such other action as the Division deems necessary to achieve restoration. In such case, the costs of restoration and litigation, including reasonable attorney's fees, shall be borne by Grantor or those of its successors or assigns against whom a judgment is entered. In the event a judgment is entered against the Division in an effort to seek injunctive relief or restoration and Grantor is held not to be in violation of this Easement, the Division shall pay Grantor's costs of litigation, including reasonable attorney's fees.

C. Actual or Threatened Non-Compliance. Grantor acknowledges that actual or threatened instances of non-compliance under this Easement constitute immediate and irreparable harm. The Division is entitled to invoke the equitable jurisdiction of any court to enforce this Easement.

Ent 020460 Bk 043 Pg 546

D. Cumulative Remedies. The Division's remedies set forth in this Easement are cumulative. Any, or all, of the remedies may be invoked by the Division if there is an actual or threatened violation of this Easement.

E. Delay in Enforcement. A delay in enforcement shall not be construed as a waiver of the Division's right to enforce the terms of this Easement.

#### SECTION VII - COSTS AND TAXES

Grantor retains all responsibilities and shall bear all costs and liabilities of any kind related to the ownership, operation, upkeep and maintenance of the Property, including responsibility for the control of noxious weeds in accordance with all applicable Utah laws. Grantor shall pay any and all lawful taxes, assessments, fees, and charges levied by competent authority on the Property.

#### SECTION VIII - INDEMNITY

Grantor agrees to bear all costs of operation, upkeep and maintenance of the Property, and agrees to indemnify the Division against all claims and obligations arising from such operation, upkeep, and maintenance activities. Grantor also agrees to defend and indemnify the Division against obligations arising from past, present or future dumping of hazardous materials on the Property, and any obligations associated with their cleanup or containment.

#### SECTION IX - ASSIGNMENT OF EASEMENT

The Division may not transfer or assign its interest in the Property created by this Easement without first notifying the landowner and may not transfer or assign any interest in the Property created by this Easement except to a "qualified organization" (within the meaning of Section 170(h) (3) of the Internal Revenue Code) which is organized or operated primarily or substantially for one or more of the conservation purposes specified in Section 170(h) (4) (a) of said Code. Any such qualified organization shall agree to enforce the conservation purposes protected by this Easement.

#### SECTION X - BASELINE DATA

The Parties acknowledge that an inventory of baseline data relating to the Property has been completed by competent professionals familiar with the Property, and furnished to the Division by Grantor. Copies of this inventory of baseline data are on file in the Divisions' Salt Lake City, Utah offices. The Parties acknowledge that this collection of baseline data contains an accurate representation of the Property's condition and natural resources as of the date of the execution of this Easement in accordance with Treasury Regulation 1.170A-14(g)(5)(I).

Notwithstanding the foregoing, should a future controversy arise over the biological and/or physical condition of the Property, the Parties may use all relevant documents, surveys, reports and other information to assist in resolving the controversy.

If range or habitat conditions significantly improve on the Property, the Parties may agree to prepare an updated inventory of baseline data to document the improved conditions. The updated inventory of the baseline data must be approved in writing by the Parties. Upon approval, the updated inventory of baseline data will be used as the baseline for future monitoring.

#### SECTION XI - EXTINGUISHMENT OF DEVELOPMENT RIGHTS

Grantor hereby acknowledges the extinguishment of all development rights associated with the Property, except those specifically reserved herein. Grantor agrees that all rights or interests in such development rights are terminated and extinguished, and may not be used on or transferred to any portion of the Property as it now or hereafter may be described, or to any other adjacent property, nor used for the purpose of calculating permissible lot yield or density of the Property or any other property with regard to any land use or zoning which affects, or may affect, the Property.

#### SECTION XII

#### SUBSEQUENT SALE, EXCHANGE, OR INVOLUNTARY CONVERSION

Grantor and the Division agree that the conveyance of this Easement creates a property right immediately vested in the Division. The Division's property right in this Easement shall be based on the condition and improvements on the Property at the time the Easement is established, and this condition shall be documented as referred to in Section X, above. For purposes of this Section, the property right shall be deemed to have a fair market value at least equal to the proportionate value this Easement bears to the entire value of the Property as a whole at the time of its creation. That proportionate value of the Division's property rights shall remain constant. Should a change in conditions give rise to the extinguishment of this Easement, as provided in Treasury Regulation Section 1.170A-14(g)(6)(I), or extinguishment of a portion of the Division's rights under this Easement, the Division on a subsequent sale, exchange, conveyance, or involuntary conversion of the Property or a portion of the Property shall be entitled to a portion of the proceeds at least equal to such proportionate value of this Easement as established at the time of its creation. All interpretations of the Division's property rights shall follow Treasury Regulation Section 1.170.

Whenever all or part of the Property is taken in exercise of eminent domain, or under claim of rights of eminent domain, by public, corporate, or other authority so as to abrogate the restrictions imposed by this Easement, Grantor shall and the Division may join in appropriate

actions to recover the full value of the Property taken and all incidental or direct damages resulting from such taking. All reasonable expenses incurred by Grantor or the Division in any such action shall first be reimbursed out of the recovered proceeds; the remainder of such proceeds shall be divided between Grantor and the Division in proportion to their interest in the Property, as provided in the first paragraph of this Section.

Grantor agrees that reference to this Easement will be made in any subsequent deed, or other legal instrument, by means of which any interest in the Property (including any leasehold interest) is conveyed, and that a copy of this Easement will be attached thereto. Grantor will notify the Division in writing of any conveyance of interest by sending written notice to the Division as provided in Section IV, Subsection A. Grantor agrees to provide notice of this Easement to all successors in interest, and to any potential purchasers or subsequent owners. In the event Grantor elects to sell the Property, Grantor agrees to provide notice of this Easement in any sale or solicitation materials or information. Any failure to comply with the terms of this paragraph shall in no manner render this Easement or any provisions of this Easement unenforceable.

### SECTION XIII - MISCELLANEOUS PROVISIONS

A. Partial Invalidity. If any provision of this Easement, or the application of this Easement, or the application of this Easement to any person or circumstance is found to be invalid, the remainder of the provisions of this Easement, and the application of such provisions to persons or circumstances other than those to which it is found to be invalid, shall not be affected thereby.

B. Enforcement. Grantor intends that enforcement of the terms and provisions of this Easement shall be at the discretion of the Division, and that the Division's failure to exercise its rights under this Easement, in the event of any breach by Grantor, shall not be considered a waiver of the Division's rights under this Easement in the event of any subsequent breach.

C. "Grantor" and "Division". The term "Grantor", as used in this Easement, and any pronouns used in place thereof shall mean and include the above-named Grantor, and its heirs, personal representatives, executors, successors and assigns. The term "Division", as used in this Easement, and any pronouns used in place thereof shall mean the Division of Wildlife Resources of the Utah Department of Natural Resources and its successors and assigns.

D. Titles. Section and Subsection titles and subtitles are for convenience only and shall not be deemed to have legal effect.

E. Amendment. Nothing in this Easement shall be construed to preclude Grantor from making a subsequent conveyance of rights in the Property to further protect its Conservation Values, provided, however, that any such subsequent conveyance shall not impair any conservation purpose sought to be advanced by this Easement.

F. Liberal Construction. This Easement shall be liberally construed in favor of maintaining the Conservation Values of the Property, and in accordance with Utah Code Ann. §§ 57-18-1 to 57-18-7. The parties acknowledge that each has reviewed and revised this Easement with the assistance of counsel, and that no rule of construction resolving ambiguities against the drafting party shall be employed in interpreting this Easement.

G. Successors. This Easement is binding upon, and will inure to the benefit of Grantor's and the Division's successors in interest and assigns. All subsequent owners of the Property are bound to all provisions of this Easement to the same extent as Grantor.

H. Governing Law. This Easement will be interpreted and construed in accordance with applicable Utah laws.

I. Entire Agreement. This Easement sets forth the entire agreement of the Parties. It is intended to supersede all prior discussions or understandings.

J. Compliance With Law. All uses and practices permitted by this Easement, including the Primary Uses, shall comply with all applicable state and federal laws.

Effective Date. The effective date of this Easement will be the date signed by all Parties.

L. Notice Requirements. Grantor hereby acknowledges that the Division, at least three days prior to the execution of this Easement, discussed with it the types of conservation easements available, the legal effect of each easement, and the advisability of consulting legal counsel concerning the possible legal and tax implications associated with granting this Easement.

M. Right of First Refusal. In the event Grantor chooses to sell or convey the remaining interest in the Property encumbered by this Easement, The Division shall have the Right-of-First-Refusal to purchase said remaining interest at a value equal to any bona fide offer to purchase the remaining interest. It is understood that water is essential to the maintenance of the Conservation Values associated with the Easement Property, therefore, water rights associated with the property may be sold or otherwise disposed of only by mutual agreement. In the event that water rights are sold or otherwise disposed of, any proceeds from the sale will be split between the parties on the same basis as described in Section XII above.

N. Change of Conditions. The fact that any use of the Property expressly prohibited by this Easement or otherwise determined inconsistent with the purpose of this Easement may become significantly more valuable or economical than permitted uses, or that neighboring properties may in the future be put entirely to uses inconsistent with this Easement, has been considered by Grantor in granting this Easement. It is Grantor's belief that any such changes will increase the public's benefit and interest in the continuation of this Easement, and it is the intent

Ent 028468 Bk 043 Pg 550

of both Grantor and the Division that any such changes not be considered circumstances sufficient to terminate this Easement, in whole or in part. In addition, the inability to carry on any or all of the permitted uses, or the unprofitability of doing so, shall not impair the validity of this Easement or be considered grounds for its termination.

IN WITNESS WHEREOF, Grantor and the Division execute this Easement.

RANGE (Rev. July 1986)

**Guide to Degree of Use**

Degree of Use Description

Unused

0 percent      No livestock use.

Slight

1-20 percent    Practically undisturbed. Only choice areas and Choice forage grazed.

Moderate

21-40 percent   Most of the accessible range shows grazing. Little or no use of poor forage. Little trailing to grazing.

Full (*This or less Use is Proper Use*)

41-50 percent   All fully accessible areas are grazed. Major sites have key forage species properly utilized. Overused areas less than 10 percent of pasture area.

Close

51-60 percent   All accessible range plainly shows use and major sections are closely cropped. Livestock forced to use much poorer forage.

Severe

61-80 percent   Key forage species almost completely used. Low-value forage carrying grazing load. Trampling damage is wide-spread in accessible area.

Extreme

81-100 percent. Range appears stripped of vegetation. Key forage species are weak from continual grazing of regrowth. Poor quality forage closely grazed

1.      Determine the degree of use at or near the end of the grazing period.
2.      Proper use determination is based on key species on major sites, not total vegetation.
3.      When properly grazed, the vegetation left will supply adequate cover for soil protection and will maintain or improve the quantity and quality of desirable vegetation.

Proper use of Annual Growth Depends on SEASON OF USE:

Spring Use	(Moderate)
Summer and Early Fall Use	(Full)
Late Fall and Winter Use	Dormant season (Close)
